

So you've decided to buy a **PatioVisionHD**. Nice choice! It will provide years of high quality outdoor entertainment for your restaurant, bar, nightclub, or even your own deck at home. You'll love the appearance and portability, but don't think it has to be brought in from the elements. The actual **PatioVisionHD** lift unit itself can be left outside all year round, but depending on geographical location, the TV may have to be removed and brought inside during the extreme cold of winter in some areas (see LCD manufacturers spec sheet). The weatherproof cover is designed to extend the new appearance of the unit when not in use, although it's not required for everyday operation. The optional **Control 4 Controller** is a nice addition if you want to automate all the functions into a user friendly universal remote. Then, add a **Rain Sensor** for even greater protection of your sensitive electronics. It shuts the unit down automatically if it rains, even if the power goes out. Now that's the definition of cool! The **Blu-Ray DVD Player** is a must for those after hours movies and videos. It has web content such as NetFlx available as well. If you already have a sophisticated AV system, talk to your AV technician and decide what options are right for you. Or call one of our representatives today and we'll guide you through the process.
